HIGH BUILD 2K DTM GRAY

2.1 VOC

PRIMER FILLER/SEALER

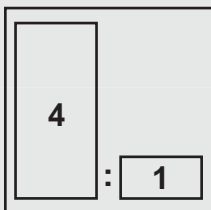

ADVANTAGE #325 High Build Direct to Metal Primer is a 2K epoxy hybrid product that exhibits anti-corrosion characteristics, excellent adhesion, exceptional filling capabilities, and ease of sanding. The addition of reducer makes it a great 2K sealer, and it's gray color provides a neutral base to paint over.

Direct to Metal Primer - Does not require a self-etching primer, eliminating extra labor, time, & gun clean-up costs!

Primer Filler - As a high build filler this product is capable of 2.5-3.0 mils per coat requiring less coats per application. Combined with easy sanding, this product will reduce repair time and increase shop productivity!

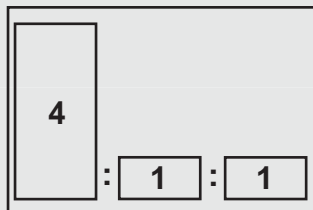

Primer Sealer - The addition of urethane reducer or exempt reducer (for compliancy) makes #325 an excellent primer sealer. Highly versatile, #325 is the perfect alternative to replace three products with one!

High Build Primer Filler

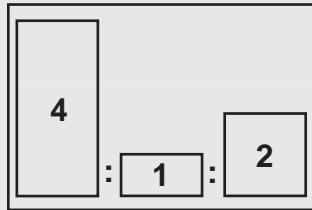

Primer : Activator

Regular Build Primer Filler

Primer : Activator : Urethane Reducer - Nat. Rule
Primer : Activator : Exempt Reducer for compliancy

Primer Sealer

Primer : Activator : Urethane Reducer - Nat. Rule
Primer : Activator : Exempt Reducer for compliancy
